Health

Environment

Our Vision

Zero Harm to employees and the environment we work in.

Our vision is to achieve Zero Harm to any of our employees through effective management of safety in all our workplaces and areas

Our vision is to achieve Zero Harm to any of our employees and ensure a healthy and productive workforce, through pro-active management of health and occupational illnesses

Our vision is to minimize harm to the environment by designing and executing our projects in an environmentally responsible manner.

Our Principles

Prevent incidents and accidents before they happen through proper planning, risk assessment and incident investigations

Abide by the Safety rules and regulations
 No repeats
 Switched-on attitude towards safety
 All injuries are preventable
 Thorough investigations and close-outs

Health related incidents are preventable
 Design for a healthy operating environment
 Continuous monitoring and feedback
 Abide and implement health and occupational hygiene standards and regulations
 Report health related incidents

Ambassadors/Accountability for the Environment
 Minimize environmental impact and footprint within the areas we operate
 Report all incidents and assess the impact through proper incident investigations

Our Policy

We are accountable for the safety of our workplace.
 We provide effective leadership and accountability to ensure good safety behavior
 We design and implement safety standards, guidelines and practices in our projects
 We apply our safety practices and abide by government rules and regulations and implement safety standards fully
 We communicate often about safety and we do not allow unsafe practices where we operate
